

Standard Uprights

STANDARD UPRIGHTS

Each Upright is equipped with a set of (4) slots positioned every 90°

- Slots are located 3/8" from top leaving a solid ring for added strength
- 3' Uprights have one set of four slots at the top
- 6' and over Uprights have two sets of four slots (one set at 3' and one set at the top)
- Additional sets of four slots may be added at any location
- Chrome end cap is standard on all 3' uprights
- All tube surfaces have protective anodized coating
- **Special Order Black Powder Coated available for an additional cost (call for prices)**
- **Custom Heights Available**

Adjustable Uprights

UNIQUE SLIP-LOCK FEATURE

- Easy to set up, accurate and rapid height adjustments
- Quickly adjusts to any height within the specific model range
- No tools required for set-up or disassembly
- No knobs or wing nuts to adjust
- All tube surfaces have protective anodized coating
- Longer 2 pc and 3 pc Uprights available

HOW SLIP-LOCK WORKS

The SLIP-LOCK collar assembly locks automatically when the inner pole is raised vertically to the desired height. As a vertical load is applied downward, the ball-taper lock feature locks tighter. The more pressure applied downward the tighter it will lock. To release the lock, simply raise the inner pole slightly and lift the release ring. For SAFETY, hold the inner pole firmly while raising or lowering the height.

Special Order **BLACK ANODIZED ADJUSTABLE UPRIGHTS AND BLACK POWDER COATED BASES** available for an additional cost (call for prices)
